Enhance your performances with ultra-low-latency SonicLink technology

## SPECIFICATIONS

<b>HDJ-F10 and HDJ-F10-TX</b>	
Type	Closed, dynamic
Frequency response	5 Hz – 30 kHz
Impedance	32 Ω
Output sound pressure level	105 dB
Unit	ø40 mm dome-type
Weight	356 g (without cable)
SonicLink	Maximum transmission distance Approx. 15 m in unobstructed locations*1 Playback time Approx. 9 hours*2
Bluetooth	Version Bluetooth standard version 5.2 Maximum transmission distance Approx. 10 m in unobstructed locations*1 Compatible Bluetooth profiles A2DP, AVRCP, HSP, HFP Compatible codecs SBC, AAC Playback time Approx. 30 hours (with ANC on)*2
Charge time	Approx. 2.5 hours (headphones)*3
Warranty period	2 years
Accessories	HDJ-F10 1.2 m coiled cable (approximately 3.0 m when extended) × 1 ø6.3 mm stereo standard plug adapter (screw-type) × 1 USB charging cable (USB Type-C to USB Type-C) 0.5 m × 1 Pair of spare ear pads × 2 Carrying pouch × 1 Quick Start Guide × 1 Precautions for use × 1  HDJ-F10-TX Transmitter (HP-TX01) × 1 1.6 m straight cable × 1 ø6.3 mm stereo standard plug adapter (screw-type) × 1 USB charging cable (USB Type-C to USB Type-C) 0.5 m × 2 Pair of spare ear pads × 2 Carrying pouch × 1 Quick Start Guide × 1 Precautions for use × 1
<b>HP-TX01</b>	
Weight	83 g (without cable)
SonicLink	Maximum transmission distance Approx. 15 m in unobstructed locations*1 Playback time Approx. 9 hours*2
Charge time	Approx. 4 hours*3
Warranty period	2 years
Accessories	1.6 m straight cable × 1 USB charging cable (USB Type-C to USB Type-C) 0.5 m × 1 Quick Start Guide × 1 Precautions for use × 1

## PRODUCT FEATURES

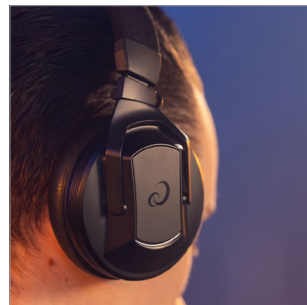

### SonicLink ultra-low-latency wireless technology

Enjoy total freedom from the constraints of headphone cables in the DJ booth or onstage. By connecting the HP-TX01 transmitter to a DJ mixer, you can use the SonicLink wireless connection to send the audio to your ears with just 9 msec of latency – 20 times faster than the commonly used Bluetooth SBC codec – so you can mix seamlessly and never notice the delay.

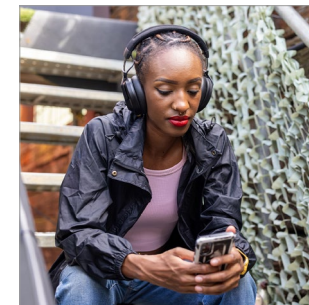

### Ruggedness for professional use

You can rely on the HDJ-F10 headphones to handle life in any environment. They're highly robust and they've passed the stringent US Military Standard MIL-STD-810H shock test.

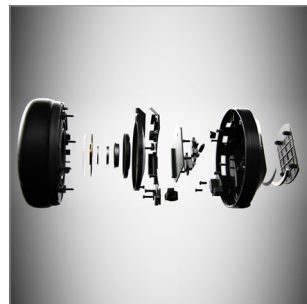

### High-volume playback and sound insulation

Hear your music loud and clear, even in a noisy environment, when using the SonicLink wireless connection. The headphones can deliver high-quality sound reproduction at high volumes, and they achieve an outstanding level of sound insulation that's better than even the Pioneer DJ HDJ-X10 model.

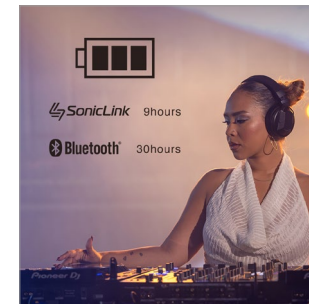

### Bluetooth connectivity and Noise Cancelling mode

Connect to a Bluetooth device and, in Noise Cancelling mode, you can shut out ambient noise – even in a busy city – and immerse yourself in the music as if you were listening to it in the studio. With Transparency mode, you can let external sounds in so you can continue having conversations with people around you while listening to music.

### Tight kick sound and wide-ranging audio

Designed with a meticulous focus on sound quality. Newly developed 40 mm driver achieves a high-resolution sound, from low to high frequencies. The housing structure combines a bass-reflex duct and air chamber to ensure a high level of sound insulation while also expanding and enhancing low frequencies.

### Long battery life

Feel confident that your headphones will go the distance, even if you're playing a long DJ set. A full battery gives you 9 hours' use with SonicLink or 30 hours' use with Bluetooth. You can also play your set with a wired connection.

\*1 Transmission distances are a guideline. Transmission distances may change depending on the connected device and the surrounding environment.

\*2 Sometimes less, depending on conditions of use.

\*3 To charge from empty state – time may vary, depending on conditions of use.
